DETAILED ACTION

This is a first action for application no. 09/866,151 in response to the Election filed on October 3, 2005 where in claims 16-33 are presented for examination.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16, 22 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,525, 882 to Asaka et al.

[claims 16, 22 and 28]

As shown in Figures 1 and 2, Asaka teaches a position detection apparatus for detecting a position of a moving robot. The position detection apparatus comprises a local image acquisition device (12R) for acquiring an image of a forward field of view of said moving robot. The apparatus further comprises a distance image acquisition device (12L), having the same field of view as the local image acquisition device. The distance image acquisition device acquires a distance image simultaneous to acquisition of an image by the local image acquisition device. A characteristic point extraction device that extracts respective characteristic points from the images by a specific method (Col 6 Line 55-Col 7 Line 12, Fig. 4A-C). Asaka further teaches a reference characteristic point selection device that selects a reference characteristic

point for calculating the position of the moving robot, based on the characteristic points and the distance image (Col 4 Line 53-Col 5 Line 7).

Allowable Subject Matter

Claims 17-21, 23-27 and 29-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US Patent 5,819,016 to Watanabe.
